 - (b) detecting multiply scattered light from the particles in response to the incident light to determine a first value corresponding to an observed isotropic scattering coefficient of the particles;
 - (c) establishing an estimate corresponding to at least one of volume fraction or size distribution of the particles;
 - (d) calculating a second value from the estimate, the second value corresponding to a calculated isotropic scattering coefficient;
 - (e) comparing the first and second values to establish an error;
 - (f) changing the estimate; ~~and~~
 - (g) repeating said calculating, comparing, and changing until the error reaches a desired minimum[.] and;
